Announcement

From April 2015 the NHS will not accept paper FP17 Claims

The NHS Business Service Authority will launch a website where practices that are not Web EDI will have to enter FP17 forms online.

It is unlikely that there will be a database of patient details, exemptions etc., so a large amount of repetition will occur when entering claim details.

The fact is you will need a PC to send your claims and the NHS are not going to fund it.

If you have to buy a PC to send claims, why not buy one which can do lots more for you?

The Shire Dental EDI system has a post code look up so that creating patient details is much quicker and more accurate.

Includes Appointment Book, Recalls, SMS and Billing. You could even add workstations and perform full chairside charting.

Add a Signature Pad and go Paperless by electronically storing FP17PR and other forms.
